Experience

Software Engineer

XEPELIN

July 2023 - March 2025

Team: Onboarding & Identity Verification

Santiago, Chile

- Developed a Nest.js microservice for biometric validation with the Mexican Electoral System (INE) via SOAP, reducing processing time and preventing identity theft.
- Optimized document validation workflows by integrating AWS services (Lambda, DynamoDB, S3), reducing manual processing time by 37%.
- Implemented A/B testing with Flagsmith to enhance user onboarding, leveraging Next.js and Nest.js with MySQL.
- Led a proof of concept using LangChain, Python, and OpenAI's API to automate legal document reviews.

Software Engineer

KUSHKI

January 2022 - July 2023

Team: Transactions & Payments Infrastructure

Quito, Ecuador

- Designed event-driven architectures for cash-in, cash-out, and transfers using AWS Lambda, SQS, Step Functions, and DynamoDB, reducing processing time by 20%.
- Built scalable REST APIs with Go and Node.js, handling high-concurrency financial transactions.
- Developed ETL pipelines with Scala to process high-volume transaction data in AWS S3, improving reconciliation speed.

Software Engineer

B89

August 2021 - January 2022

Team: Internal Platforms & Services

Lima, Peru

- Developed high-performance APIs and gRPC services with Node.js (Moleculer.js) and Apache Kafka for real-time event processing.
- Architected and implemented a modular microservices infrastructure for banking operations.

Software Engineer

DEUNA

May 2021 - August 2021

Team: Checkout & Integrations

Tegucigalpa, Honduras

- Optimized full-text search functionality using Typesense, enhancing search performance in e-commerce transactions.
- Integrated real-time order tracking using a React & TypeScript backend, ensuring seamless logistics updates.
